# Chatler Only One Vanilla - Eau de Parfum for Women 30 ml

Price	<b>5.90 €</b>
Availability	<b>Out of stock</b>
Delivery within	<b>2-4 working days</b>

## Description

**Chatler Only One Vanilla** is a vanilla perfume for women.

What Does **Vanilla Smell** Like? **Vanilla** has a creamy, warm, comforting, yet also slightly exotic **scent**. ... Scientific research has also shown it's a calming and universally pleasant **scent**. While there are popular perfumes featuring pure **vanilla**, many perfumers blend **vanilla** with florals for a classic, rich feminine **scent**. Vanilla doesn't just smell sweet, nuzzable and delectably comforting: it's kind of magic, in flavour and perfume terms. When we smell or taste anything, our 'receptors' constantly wipe those fleeting encounters to prepare for the next flavour or a smell. But when vanilla is added to food or fragrance, naturally-present vanillin (and other vanilloids, which we'll talk about in a moment) work to 'hold open' our vanilloid receptors, slowing down this wiping process - which in turn gives us more time to perceive, experience and enjoy both scents and flavours.

Vanilla comes from the seeds of a dried pod from a climbing orchid-like plant which flourishes especially well in Madagascar; the very best quality of vanilla comes from the île Bourbon, now known as Réunion. It gets its name from the Spanish word 'vaina' (meaning sheath or pod, and translates simply as 'little pod'. (Strangely, the flower itself is scent-less.) Perhaps because vanilla is the second priciest spice in the world, after saffron, the vanilla you smell in many perfumes today is synthetic vanillin: clever chemists have worked to mimic the real thing - although the most gifted noses will probably tell you that real vanilla is earthier, with touches of treacle and a touch of 'booziness'.
