Description

Nano Silver Colloid 35 ppm - Antibacterial Alcohol-free Disinfectant spray - 30 ml Non-alcohol sanitizer spray that effectively kills 99.9% of viruses and bacteria. An intensive cleansing and moisturizing product for hands, face and body. Harmless to the children. Dermatologically and microbiologically tested. The action is based on the active ingredient - nonionic silver in a high concentration of 35 ppm. Doesn't dry out skin like alcohol-based products. Effectiveness confirmed by research - patent number 210388. The spectrum of colloidal silver's activity is extremely wide - it kills bacteria (aerobic and anaerobic), viruses and fungi. Silver particles prolong the effectiveness of the spray and support its antimicrobial and antiviral effects. Certified product. Don't use if you are allergic to silver. Made in EU.
